# Office for Nuclear Regulation (ONR) Site Report for Springfields Works

Report for period 1 January – 31 March 2022

#### **Foreword**

This report is issued as part of ONR's commitment to make information about inspection and regulatory activities relating to the above site available to the public. Reports are distributed to members for the Springfields Fuels Limited Site Stakeholder Group and are also available on the ONR website (http://www.onr.org.uk/llc/).

Site inspectors from ONR usually attend Springfields Fuels Limited Site Stakeholder Group meetings where these reports are presented and will respond to any questions raised there. Any person wishing to inquire about matters covered by this report should contact ONR.

**Report Period:** 1 January – 31 March 2022

## 1. Inspections

### 1.1. Dates of Inspection

ONR Inspectors made inspections on the following dates during the report period 1 January to 31 March 2022:

- 10, 17 & 23 February 2022
- 23 March 2022

Report Period: 1 January – 31 March 2022

#### 2. Routine Matters

#### 2.1. Inspections

Inspections are undertaken as part of the process for monitoring compliance with:

- the conditions attached by ONR to the nuclear site licence granted under the Nuclear Installations Act 1965 (NIA65) (as amended);
- the Energy Act 2013
- the Health and Safety at Work Act 1974 (HSWA74); and
- regulations made under HSWA74, for example the Ionising Radiations Regulations 2017 (IRR17) and the Management of Health and Safety at Work Regulations 1999 (MHSWR99).

The inspections entail monitoring the licensee's actions on the site in relation to incidents, operations, maintenance, projects, modifications, safety case changes and any other matters that may affect safety. The licensee is required to make and implement adequate arrangements under the conditions attached to the licence in order to ensure legal compliance. Inspections seek to judge both the adequacy of these arrangements and their implementation.

In this period, routine inspections of Springfields Works covered the following:

- radioactive waste management;
- decommissioning;
- organisational changes;
- conventional (non-nuclear) health and safety;
- safeguards;
- security

Members of the public, who would like further information on ONR's inspection activities during the reporting period, can view site Intervention Reports at <a href="https://www.onr.org.uk/intervention-records">www.onr.org.uk/intervention-records</a> on our website <a href="https://www.onr.org.uk">www.onr.org.uk</a> .Should you have any queries regarding our inspection activities, please email contact@onr.gov.uk.

Report Period: 1 January – 31 March 2022

#### 2.2. Other Work

Despite increasing Covid-19 cases regulation of on-site operations continues. Covid-19 management arrangements continue to be in place at the Springfields Works to ensure continued operational safety and emergency response capability.

The site inspector held a periodic meeting with safety representatives, to support their function of representing employees and receiving information on matters affecting their health, safety and welfare at work.

ONR continue to work with Springfields Fuels Limited and their Parent Body Organisation, Westinghouse Electric Company LLC in exploring the regulation of future potential business opportunities at the Springfields Works site.

Report Period: 1 January – 31 March 2022

#### 3. Non-Routine Matters

Licensees are required to have arrangements to respond to non-routine matters and events. ONR inspectors judge the adequacy of the licensee's response, including actions taken to implement any necessary improvements.

Matters and events of particular note during the period were:

A RIDDOR reportable injury was reported to ONR in March 2022 relating to an incident involving an individual attempting to free a drum that had become wedged during an operation. As the drum was freed it came down and hit the injured person's right hand causing cuts to the middle and forefinger of the right hand. The injured person was transferred to hospital where sutures were applied to both fingers on the palm side. Subsequently they were unable to perform their work duties for over 7 days.

Report Period: 1 January – 31 March 2022

## 4. Regulatory Activity

ONR may issue formal documents to ensure compliance with regulatory requirements. Under nuclear site licence conditions, ONR issues regulatory documents, which either permit an activity or require some form of action to be taken; these are usually collectively termed 'Licence Instruments' (LIs) but can take other forms. In addition, inspectors may take a range of enforcement actions, to include issuing an Enforcement Notice.

No LIs, Enforcement Notices or Enforcement letters were issued during this period.

Report Period: 1 January – 31 March 2022
